FUGATE AND SPRADLIN JOIN NESBITT ENGINEERING, INC.

LEXINGTON KY, AUGUST 5, 2008: Nesbitt Engineering, Inc. is pleased to announce the recent addition of Steven Fugate and David Spradlin to their office in Prestonsburg, KY. Steven and David will join NEI's survey field crews, performing various types of boundary, topographic and control surveys for clients in the oil and gas industry.

"Our field crews are a vital component of our company's success", stated Paul D. Nesbitt, the company's president. "They're demanding positions that require diverse skills. Surveys are often conducted in remote areas, and can require a lot of climbing with equipment during hot summers and cold winters."

Originally from Paintsville, David Spradlin attended Big Sandy Community and Technical College, and was formerly a U.S. Marine stationed in Iraq.

A native of Hazard, KY, Steven Fugate attended Hazard Community & Technical College and worked as an Instrument/GPS Operator for a number of years prior to joining NESBITT.

With offices in Lexington, Hazard and Prestonsburg, NESBITT provides engineering consulting services in a broad range of disciplines including solid waste management, civil engineering, mining engineering, oil and gas consulting, surveying and environmental sciences.
